

BLUE *HYBRID* LIFT

HYBRID SIMPLIFIED

Introducing the Bluelift Hybrid – a first-ever full hybrid solution that can switch from battery power to combustion engine. This industry-leading design delivers versatility as it reduces emissions in three energy-efficient operating modes.

ALL ELECTRIC	ALL ENGINE	AUTO
Machine is solely powered from a 90 amp/hr lithium cell battery whilst operating in a fixed position	Machine is solely powered by its combustion engine	Machine pre-selects most efficient power source automatically between battery power and its combustion engine
Rapid recharge (2hrs)*	Ideal for outdoor usage	Maximises battery cycle/working time
Full power, full speed	Full power, full speed	Most efficient fuel-saving mode, 4-5 hours of continuous use**
On-board charger for recharging	Able to travel long distances	Low emissions - both noise and environment
Can charge while in fixed position		

*2 hours to 80%. **Length of change depends on duty performed.
